

DEFI YIELD PROTOCOL

PITCH DECK
2022

DeFi Yield Protocol Overview

Building a Decentralized Ecosystem

DeFi Yield Protocol (DYP) is an advanced, revolutionary, and decentralized ecosystem offering a variety of products and solutions for yield farming, staking, and NFTs. DYP also enables users to utilize DYP's advanced proprietary trading tools. This unique platform is committed to continuously expanding its offerings to include more advanced DeFi products, educational tools, NFTs, and the soon to be released virtual reality Metaverse gaming platform. These robust features allow users of all backgrounds and experiences to make properly informed decisions and enjoy incredible utility throughout their Defi journey.

DYP made history in the DeFi space by becoming the first and only protocol to reward users in Ethereum. The protocol employs an anti-manipulation feature that aims to limit the market impact on users converting rewards into ETH and other native platform tokens. Anti-manipulation allows DeFi Yield Protocol to maintain stability, fair access to liquidity, and provide a secure and simplified DeFi platform for users of all sizes.

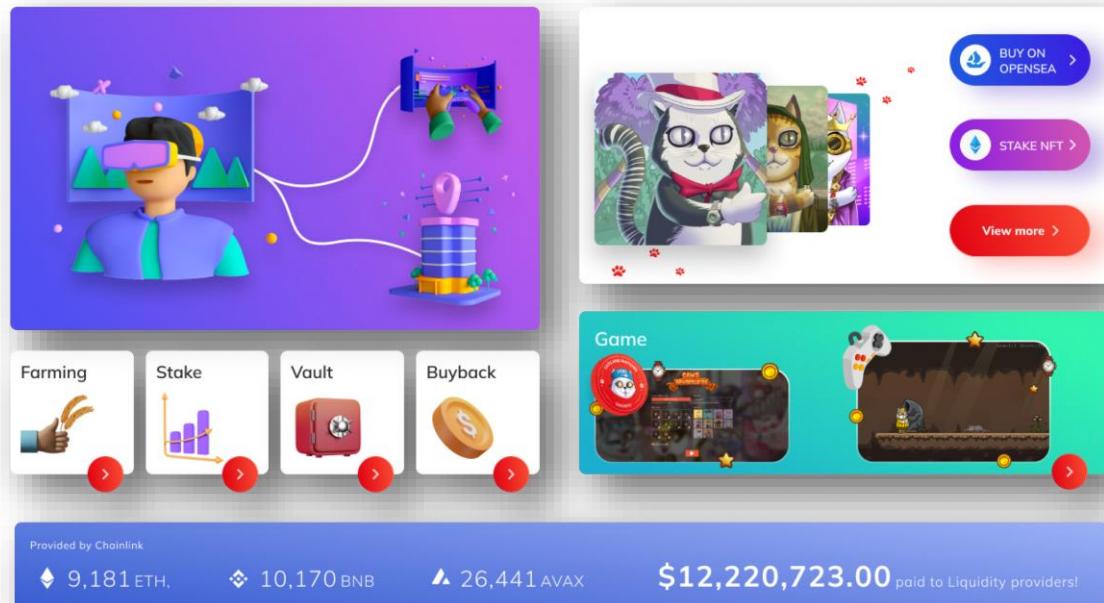

DYP also provides its core feature of decentralized tools in an easy-to-navigate user dashboard. These tools provide advanced features such as Decentralized Score, Unique Community Trust Vote System, DYP Locker, Yield Farm Data, Launchpad, and more. Utilizing these unique tools will allow users access to unparalleled insight into a project's performance and potential.

Why DeFi Yield Protocol?

Extended Product Catalogue

DYP offers a large diversity of products on the platform that generates value to users like Farming, Staking, The Vault, Buyback, CAWS NFT, DYP Governance and much more.

Adaptability

DYP prides itself in its ability to quickly adapt to the new and emerging market trends. DYP's flexibility and expertise allows for pioneering in the Defi Space in a quick and unparalleled innovative way.

Trusted Partner

DYP is proud to be a listed alongside a growing list of trusted and secure partners audited by some of the best companies in the business.

Unique Solutions

DYP offers unique solutions in the Defi space like Anti-Manipulation that users will benefit from in even the simplest of operations.

Market Consistency

DYP has a very well-known, trusted, and stable history in the Defi market which is reflected by its outstanding statistics and user feedback.

Education & Protection

We help, educate, and protect every DYP user by giving them the right information, data analytics, and new trends through our unique solutions safety measures.

Our Solutions

1

Unique breakthroughs contributing to the crypto space

DYP has created game changing breakthroughs by helping users protect and understand the crypto space while contributing solutions for the future.

2

Contribute and design solutions for the future

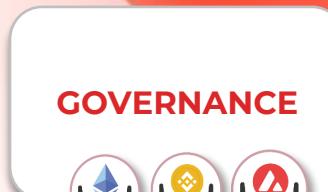

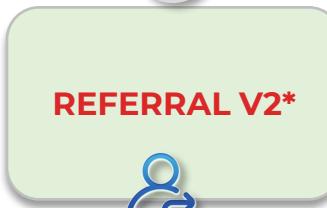

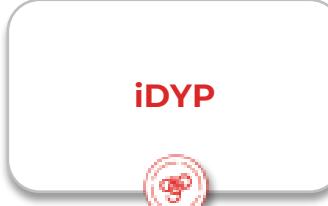

The digital currency world is continuously changing, and it is crucial to maintain flexibility and an understanding of the market to offer a diversity of future-forward solutions for DYP users.

3

Supporting new projects

DYP helps to support users achieve a successful project with the unique DYP Locker solution. This ensures the safety of user liquidity by locking funds on a decentralized exchange.

*Products coming soon

DYP Tools

Smart Contract Risks

Hundreds of millions of dollars have been lost in the last 12 months because of smart contract bugs. Unlike DYP, most DeFi projects are not running security audits for their contracts resulting in lost Users funds.

DYP Locker

DYP Locker is a game changer. Users will not be charged fees. To create a lock, approx. 1% of the LP value will be sent as ETH which will be used to buy and lock DYP with the liquidity. DYP will then be released to the recipient wallet along with liquidity once unlocked.

Scams - Rug Pulls

"Getting rugged" is a common phrase in the crypto space. A November 2021 study found [Source](#) that 50% of all token listings on Uniswap are scams. Therefore, DYP feels it is important to fully understand projects users may be looking to invest in.

Unfair Voting System

DYP Tools comes with a Unique Community Trust Vote System. Most of the current cryptocurrency data aggregators use a voting system that can be easily manipulated. DYP's Unique Community Trust Vote System ensures project voting can be trusted and relied upon.

Premium Subscription

In order to access Premium Subscription users must hold DYP token to benefit from advanced features, such as Decentralized Score, Unique Community Trust Vote System, DYP Locker, Yield Farm Data, and LaunchPad for the users.

Anti Manipulation

Anti-manipulation aims to maintain stability, fair access to liquidity, and provide a secure and simplified DeFi platform for users of all sizes

Deposit your liquidity provider tokens to receive Ethereum rewards

Deposit your liquidity provider tokens to receive ETH/BNB/DYP as rewards

Deposit your liquidity provider tokens to receive WAVAX/ETH/DYP as rewards.

DeFi Yield Protocol works to curb the influence of large whale users. The protocol employs an anti-manipulation feature that aims to limit the market impact on users converting rewards into ETH and other native platform tokens.

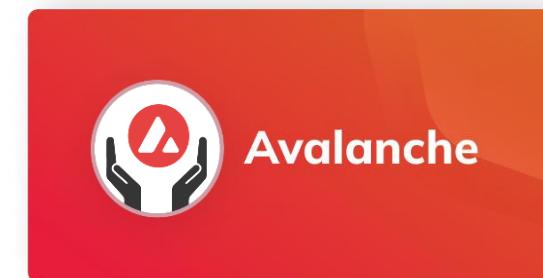

To maintain token price stability, every 24 hours the smart contract will automatically try to convert DYP rewards into ETH and other native platform tokens.

If the price DYP is affected by more than -2.5%, then the maximum DYP amount that does not affect the price will be swapped, with the remaining amount distributed in the next day's rewards. After seven days, if we still have undistributed DYP rewards, the DeFi Yield protocol governance will vote on whether the remaining DYP will be distributed to the token holders or burned (all burned tokens are removed from circulation).

DYP Governance

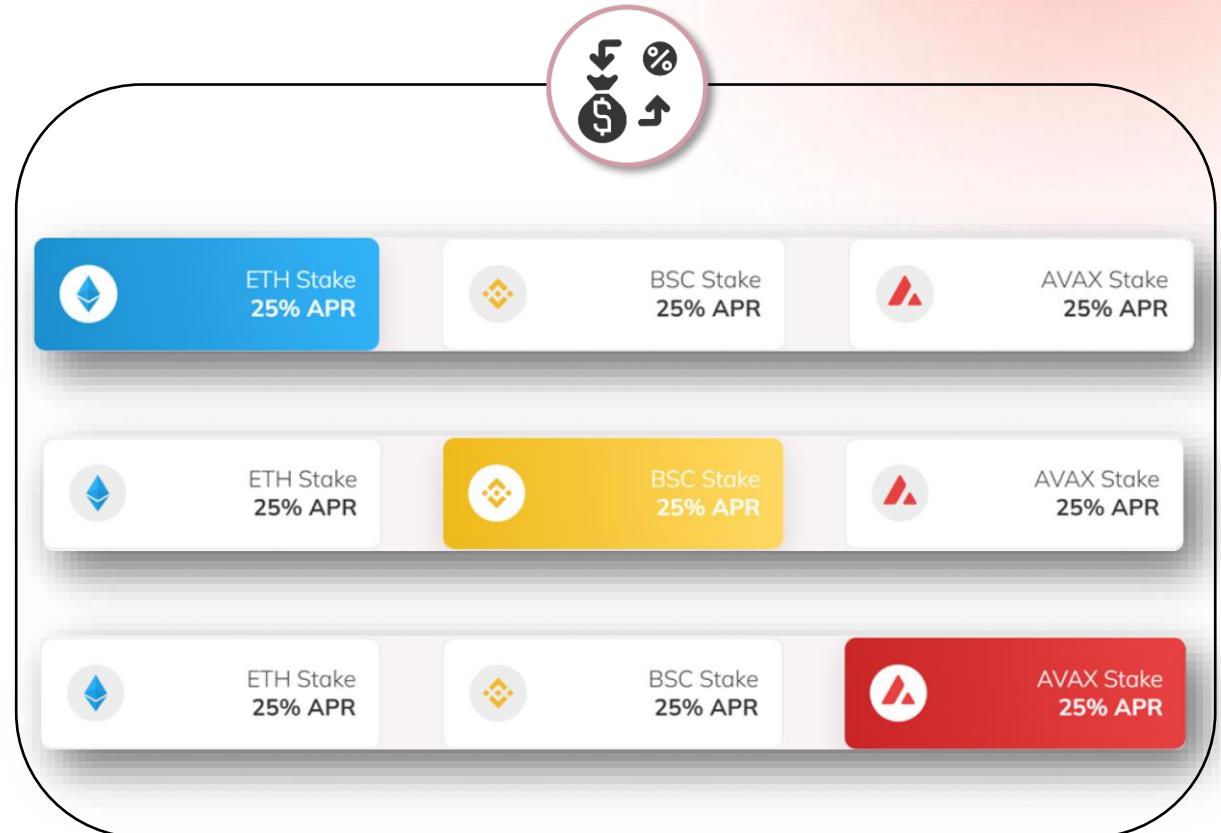

DYP tokens represent voting shares in DeFi Yield Protocol governance. The introduction of DYP tokens enables shared community ownership of a vibrant, diverse, and dedicated governance system which will actively guide the protocol into the future.

Through governance, DYP holders can vote to add more pools, burn tokens, or allocate DYP toward grants, strategic partnerships, governance initiatives, and other programs.

Stake

- Deposit your DYP tokens to earn rewards with no Impermanent Loss.
- To start earning DYP rewards, users will deposit DYP tokens into their choice of staking pools. There are four different staking options, with dynamic APR depending on the lock time with options as low as thirty days and up to 120 days.
- One of our most popular pools offers a fixed 25% APR in ETH rewards.
- The staking pools also integrate the REINVEST function. This allows users to add their daily rewards to the staking pool.
- In addition, DYP Referral is available. Users may refer DYP to their friends and 5% of their friends' rewards will be automatically distributed to the users whenever friends stake DYP. Users have no need to stake, the rewards are distributed automatically, free of gas fees.

Farm

Automatically adds liquidity to Uniswap V2 & deposit to the staking contract using one asset. To start earning, all you need is to deposit one of the supported assets (WETH, WBTC, USDC, or USDT) and earn WETH/USDT/DYP as rewards. All pool rewards are automatically converted from iDYP to WETH by the smart contract, decreasing the risk of iDYP price volatility.

9,181 ETH paid to the Liquidity providers since launch!

Automatically adds liquidity to PancakeSwap V2 & deposit to the staking contract using one asset. To start earning, all you need is to deposit one of the supported assets (WBNB, BTCB, ETH, BUSD, CAKE, or iDYP) and earn WBNB/ETH/DYP as rewards. All pool rewards are automatically converted from iDYP to WBNB by the smart contract, decreasing the risk of iDYP price volatility.

10,170 BNB paid to the Liquidity providers since launch!

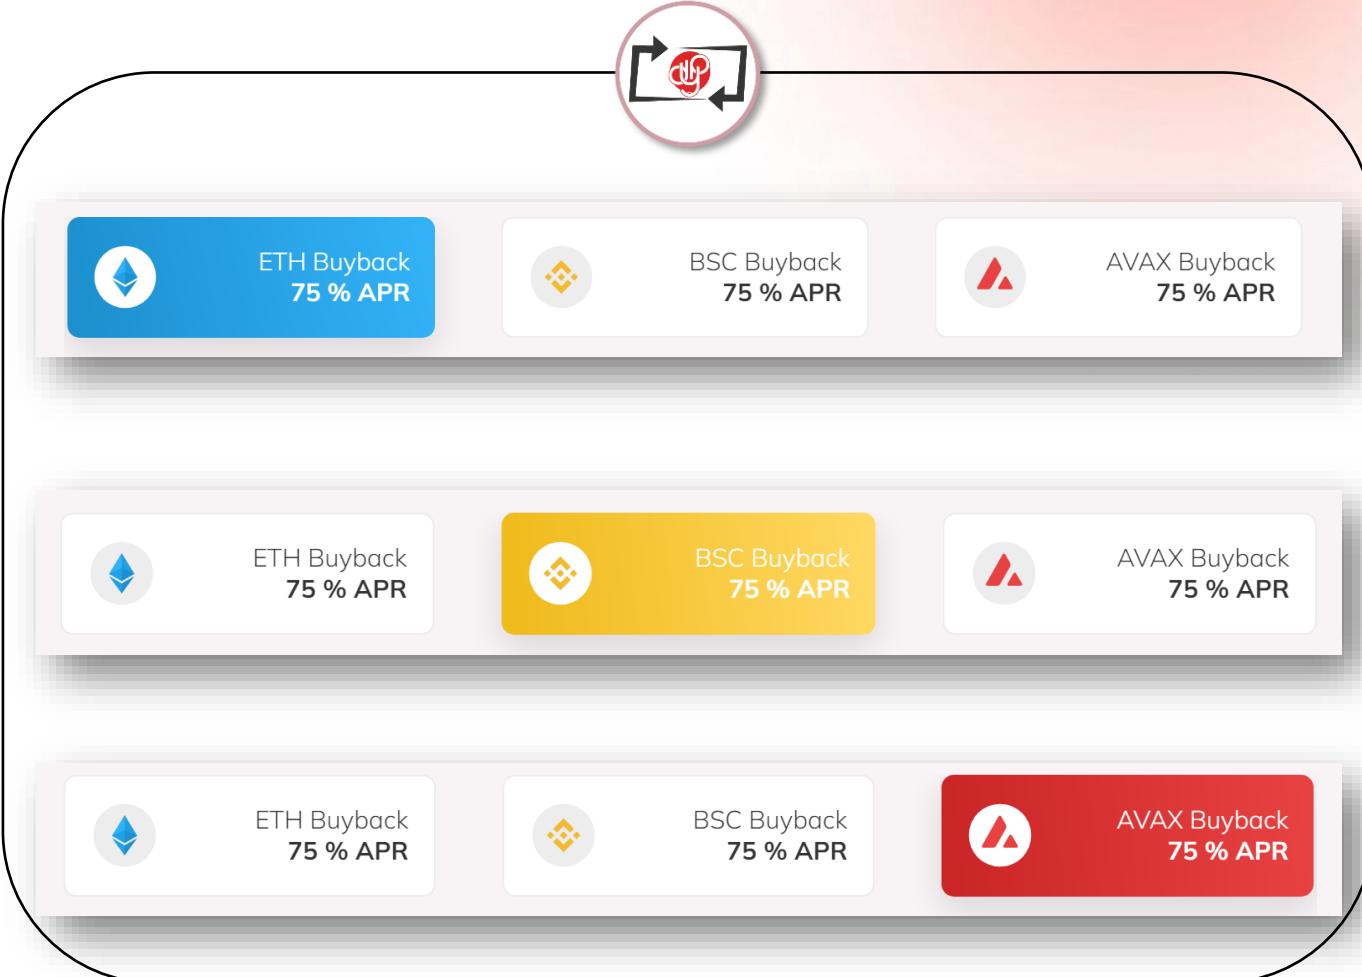

Automatically adds liquidity to Pangolin & deposit to the staking contract using one asset. To start earning, all you need is to deposit one of the supported assets (WAVAX, USDC.e, USDT.e, WETH.e, PNG, QI, DAI.e, XAVA, WBTC.e, LINK.e, or iDYP) and earn WAVAX/ETH/DYP as rewards. All pool rewards are automatically converted from iDYP to WAVAX by the smart contract, decreasing the risk of iDYP price volatility.

26,441 AVAX paid to the Liquidity providers since launch!

Buyback

- Supported Assets are based on chose chain utilized:
 - **Ethereum Network:** WETH, WBTC, USDC, USDT, DAI, or LINK.e
 - **BNB Chain:** WBNB, BTCB, ETH, BUSD, or CAKE
 - **Avalanche Network:** WAVAX, USDC.e, USDT.e, WETH.e, PNG, QI, DAI.e, XAVA, WBTC.e, or LINK.e
- Deposit your asset of choice and earn 75% APR in DYP.
- To start earning, all you need to do is deposit one of the supported assets into the Buyback contract. All assets will automatically be converted into DYP + iDYP and deposited into a staking contract. The rewards are distributed automatically and can be claimed every day. When users unstake they will receive all the deposited amounts in DYP.

Vault

DYP Earn Vault is an automated yield farming contract with Compound Protocol integration and support for ETH, WBTC, USDC, USDT, and DAI markets.

The interest from Compound is entirely distributed to the users. In addition, through other strategies, a substantial proportion of the profits (75%) is converted to ETH and distributed to the liquidity providers, and the remaining (25%) is used to buy back our protocol token and burn it.

Bridge

BNB Chain Bridge

The Bridge will help you swap DYP tokens between Ethereum Network and Binance Smart Chain Network.

Avalanche Network Bridge

The Bridge will help you swap DYP tokens between Ethereum Network and Avalanche Network.

CAWS NFT

Cats and Watches Society (CAWS) NFT is a unique collection of 10,000 randomly generated, hand-drawn utility NFTs, developed by DeFi Yield Protocol. These unique NFTs are stored on IPFS utilizing the Ethereum blockchain and consist of over 235 different traits, each outfitted with its own luxury watch of various rarities.

By purchasing a CAWS NFT on the secondary market like the verified collection on OpenSea, owners will automatically be granted access to the members-only Society Benefits Zone. Users may also choose to sale and trade their NFTs on the secondary market.

The rarity of your CAWS NFT can be found on many partnered sites like Rarity Tools, RaritySniper.com, Traitsniper and even a rarity bot set up in the discord server.

One of the most unique CAWS NFT utilities is that you can join CAWS staking pool to earn 50% APR in real ETH rewards.

CAWS NFT owners also gain exclusive access to the 2D Platformer CAWS Adventures where top players are be eligible for prizes and rewards.

Holders will also get access to a free additional standalone watch NFT, holder only discord alpha channels, the incredible community, and many other exciting prizes and giveaways.

Cats and Watches Society is also building its own virtual reality Metaverse with an exciting play-to-earn (P2E) game coming soon that you won't want to miss!

Visit <https://dyp.finance/caws> for more details or join us on discord at <https://discord.gg/dycaws> for the latest updates and giveaways.

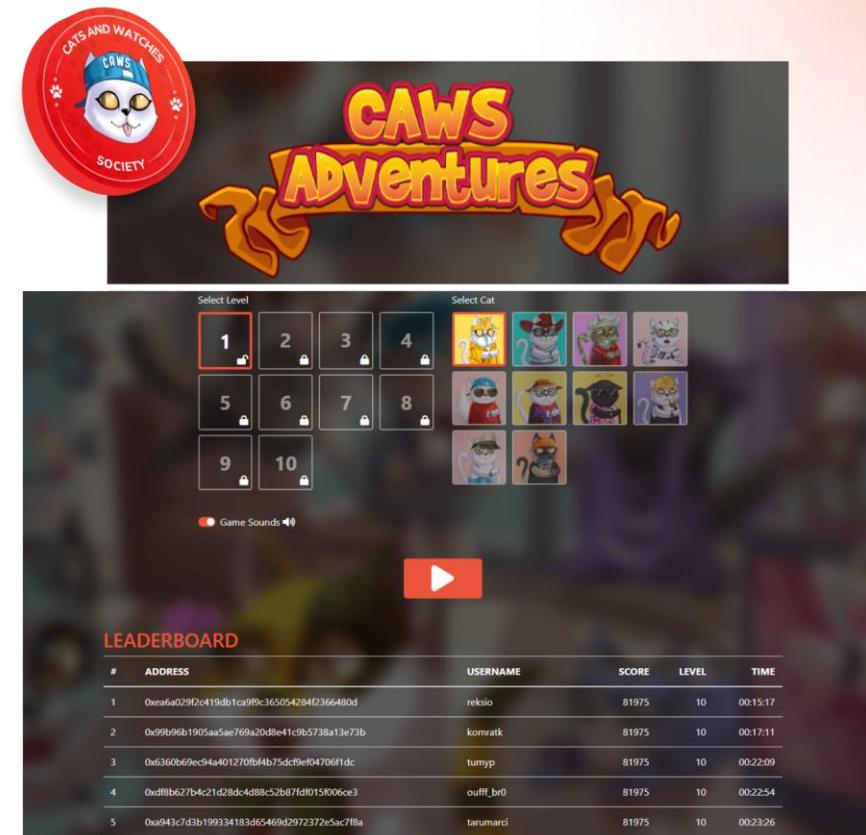

CAWS ADVENTURES

CAWS Adventures fun and quirky GameFi feature enables CAWS NFT holders to utilize their cats in a 2D side scrolling platformer for both mobile and PC players alike!

Players in-game performance helps them rank on a leaderboard and provides opportunities for exciting prizes and rewards!

Players must hold at least one CAWS NFT in their wallets or in the staking pool to play the game. This way, holders can add to the list of exciting utility the Cats and Watches Society NFT offers.

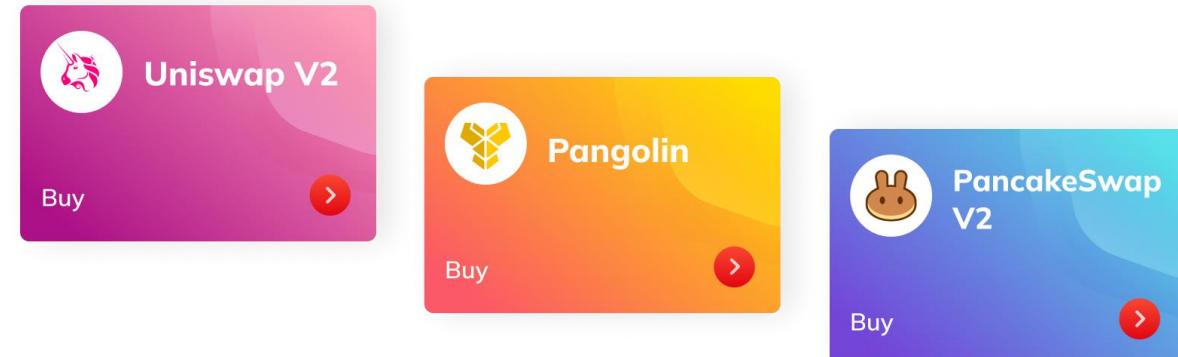

Introduction to iDYP

IDYP is an ERC-20 token available on Ethereum, Binance Smart Chain, and Avalanche that is used within the DeFi Yield Protocol ecosystem as part of the smart contract's strategies. IDYP tokens facilitate the rewards for the farm, buyback, vaults, and staking pools. DeFi Yield Protocol has a multi-token economy and uses another ERC-20 token called DeFi Yield Protocol (DYP) as a governance token for its ecosystem.

DeFi Yield Protocol is also building its own Metaverse with an exciting play-to-earn (P2E) game still in development. The game will require players to use two tokens, iDYP and DYP. For example, they can use iDYP to boost the energy levels of their characters, but on the other hand, they can use DYP tokens for purchasing in-game items.

HOW CAN I GET **iDYP TOKENS?**

The external market for iDYP emerged when a liquidity pool for iDYP was created on the decentralized exchanges (DEX) Uniswap, Pangolin, and PancakeSwap bringing iDYP out of the DeFi Yield Protocol ecosystem and into the crypto market.

Launchpad

Our LaunchPad will provide access to high-quality crypto projects. DeFi Yield Protocol LaunchPad brings new token offerings to market and users will be able to participate in primary token offerings as per their staking, farming balance, or DYP Tools premium subscription.

Key Features

Mandatory smart contract audits by a top-tier auditors

Know Your Customer ("KYC") of the project team
Liquidity locked utilizing DYP Locker

Team tokens locked on vesting contracts

For Users

- ✓ Project outline
- ✓ Due diligence reports
- ✓ Audit reports for contracts
- ✓ How much the project will bring
- ✓ How much the project raised
- ✓ Multiple tiers depending on the amount of locked DYP
- ✓ Varied max token buy available at different tiers

For Teams

- ✓ Tier smart contract to allow users to lockup DYP for relevant tiers
- ✓ Integrated standard presale smart contracts accept USDC, USDT, DAI, WBTC, WBNB, WAVAX and WETH at predefined rates
- ✓ Users get tokens instantly, and collected funds are in the DYP team's custody, to be delivered to the fundraiser team by DYP
- ✓ Integrated Token Locker smart contract with presale contract to automatically lock tokens for a predefined time after the purchase

Referral Program

The DeFi Yield Protocol Referral Program is our way of thanking and rewarding users for being an active member of the community and for sharing and promoting our products. If this sounds like something for you and you would like to earn a steady stream of benefits, join our referral program and receive the following benefits:

Benefits

- 45 Days Cookie Duration.
- Up to 8% lifetime commission for every user.
- Up to \$300 Sign Up Bonus.
- A fixed 5% lifetime commission for each new user who is part of the referral program.
- Special Campaigns to earn extra rewards.
- An advanced analytics tool to track how your visitors are performing.
- Access to hundreds of pre-made banners that you can share on all your social media to customize referrals.
- Access to an embed code that you can use to post our premade banners to your website.

Metaverse Gaming

A unique metaverse platform that will unleash a new experience on gaming services and digital currency

The Metaverse Mining platform is a feature-rich RPG where players can explore through endless mines hunting for rewards, special items and digital currency. The game features a main character and a cat (NFT) companion which will begin their journey together to mine in different exotic locations with different difficulty levels. Players without a CAWS NFT will be able to access the metaverse, but they will gain even more utility by purchasing a NFT in the Open World section.

What makes this gaming experience unique is that almost all items in the game are decentralized, using the power of innovative blockchain technology. That means players truly own their game assets as they can freely trade them with other players, sell them for real-world value, and use across different mines.

The Metaverse Mining Gameplay is designed to be a game where players are the ultimate protagonists as they constantly shape the game but can also earn rewards from their achievements. DYP is building a gaming world for diverse players, with the aspiration to allow the community to adopt various gameplay roles and freely run a decentralized, player-owned economy.

Brand Awareness

Our Ethereum Mining Farm

Defi Yield Protocol is backed by an Ethereum Mining Farm with a 35 GH/s hash rate.

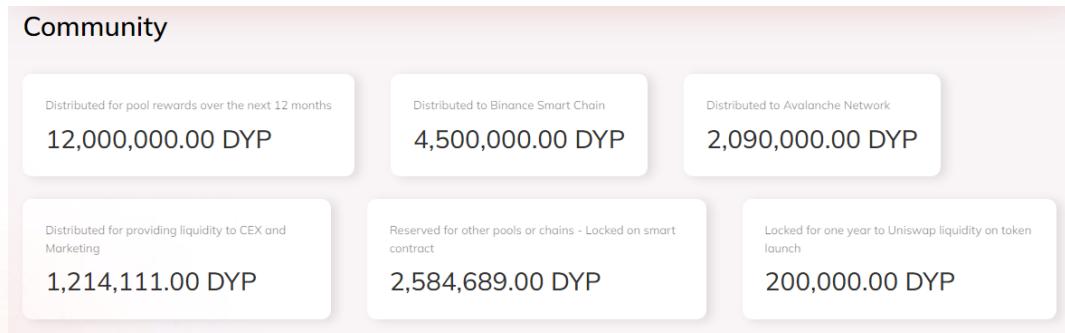

What exactly does this mean? Based on Ethereum mining difficulty and gas price, DYP earns between 50 ETH — 150 ETH every month. All earnings from the mining activity go back to DYP directly.

DYP uses these funds for development and marketing costs. More than \$1.5 Million generated from our mining farm has been invested back into our platform.

Tokenomics

30,000,000 DYP have been minted at genesis and will become accessible over the course of 2 years.

Defi Yield Protocol unquestionably values your security. Therefore, we have chosen three reputable security audit companies: Peck shield, Blockchain Consilium, and Certik Foundation to provide their services to avoid any vulnerabilities in the development of our smart contracts.

In addition, all our smart contracts are monitored 24/7 through a Security Oracle, powered by Certik Foundation and accessible through our repo.

Roadmap

2021 Q3

- ✓ Launch DYP Tools V1 on Avalanche Chain
- ✓ Integration with Pangolin DEX, Coin98 Wallet, and Kyber Network
- ✓ Integration for Wallet Connect
- ✓ Building New Smart Contract for Farm, Stake, Buyback, and Governance
- ✓ Launch New Smart Contract for Farm, Stake, Buyback, and Governance
- ✓ Launch iDYP Token as part of the New Smart Contracts

2021 Q4

- ✓ Launch DYP LaunchPad with DYP Tools Safety Features integrated
- ✓ Building New UI Design for Dapps
- ✓ Building New UI Design for Main Website
- ✓ Building New Smart Contract for DYP Vault
- ✓ Integration with Crypto.com RSS News Feed

2022 Q1

- ✓ Launch Cats and Watches Society NFT
- ✓ Launch New Smart Contract for DYP Vault
- ✓ Building CAWS Adventures 2D Game
- ✓ Building CAWS Staking Smart Contract
- ✓ Building New Smart Contract for DYP Staking

2022 Q2

- ✓ Launch New Smart Contract for DYP Staking
- ✓ Launch Cats and Watches Society Staking Pool
- ✓ Launch New UI Design for Main Website
- ✓ Launch New UI Design for Dapps
- ✓ Launch CAWS Adventures 2D Game
- ✓ Play to Earn NFT Concept becomes active for CAWS Holders

2022 Q3/Q4

- « Metaverse Research and Launch of Different Products
- « Metaverse Begins for the CAWS (Cats and Watches Society)
- « Rebranding Process
- « Building Extra Features for DYP Tools
- « Incorporation of a Legal Entity for upcoming Regulation For Decentralized Finance
- « Expanding our Products to other Chains
- « Launch App for iOS and Android
- « Launch Multi-Chain DEX
- « Further Extension and Project Growth in Different Areas
